

1. Executive Summary & Market Opportunity

Private moneylenders, pawn brokers, and daily collection finance agents handle crores in informal cash volume daily. Yet 90% still rely on paper diaries or error-prone Excel spreadsheets. InterestAccurate solves their three greatest pain points: (1) calculation errors in daily/monthly interest, (2) missed payment follow-ups resulting in bad debt, and (3) lack of instant borrower receipts.

2. Model A: Recurring SaaS Subscriptions (Recommended)

Recurring subscription models provide predictable, compounding Monthly Recurring Revenue (MRR). Your built-in Developer Super-Admin portal remotely enforces validity dates and automatically manages customer access.

Plan Tier	Target Client	Monthly Fee	Annual Upfront	Key Features Included
Starter	Solo lenders (<50 borrowers)	Rs. 999 / mo	Rs. 9,999 / yr (Save Rs. 2,000)	1 Staff login, Daily/Monthly loans, PDF receipts, Ledger tracking
Standard (Sweet Spot)	Growing firms (50–300 borrowers)	Rs. 1,999 / mo	Rs. 19,999 / yr (Save Rs. 4,000)	Multi-user staff, WhatsApp alerts, Overdue tracking, SMS log
Pro / Agency	Large books (>300 borrowers)	Rs. 3,999 / mo	Rs. 39,999 / yr (Save Rs. 8,000)	Unlimited loans, Agent collection tracking, Custom branding, VIP support

3. Model B: One-Time License + Annual AMC (For Traditional Lenders)

Many traditional financiers in Tier 2/3 cities prefer 'owning' their system outright rather than committing to recurring debits. Use this hybrid model to close conservative clients:

- One-Time Setup & Lifetime License: Rs. 18,000 – Rs. 35,000 (Includes software installation, manual diary migration, and 1 full year of support).
- Annual Maintenance Contract (AMC): Rs. 6,000 – Rs. 10,000 / year (Billed starting Year 2 for cloud backups, feature updates, and license renewal).
- Super-Admin Lockout Control: Set license to 365 days. The Super-Admin view automatically alerts you and flags expired licenses.

4. High-Margin Revenue Add-Ons & Upsells

- WhatsApp & SMS Gateway Credits: Buy SMS at Rs. 0.15–0.20 via fast2sms/WhatsApp API. Sell bundles at Rs. 0.40–0.50 (100%+ pure profit margin).
- Historical Data Migration: Charge Rs. 2,500 – Rs. 5,000 one-time to manually type their old paper notebooks into the software. This locks the client in for life.
- Custom Letterhead & Print Layouts: Charge Rs. 3,000 – Rs. 5,000 to customize PDF receipts with their proprietary firm logo, stamp watermark, and terms.

5. Hosting Cost vs. Profitability Projections

Because InterestAccurate uses a lean Node.js + SQLite architecture, server hosting overhead is nearly zero. A single Rs. 450/month VPS easily hosts 100+ active lenders with 95%+ net profit margins.

Active Clients	Avg Fee	Gross MRR	Server Cost	Net Profit Margin
5 Lenders	Rs. 1,999 / mo	Rs. 9,995 / mo	Rs. 450 / mo	95.5% (Rs. 9,545 / mo)
15 Lenders	Rs. 1,999 / mo	Rs. 29,985 / mo	Rs. 450 / mo	98.5% (Rs. 29,535 / mo)
35 Lenders	Rs. 1,999 / mo	Rs. 69,965 / mo	Rs. 750 / mo	98.9% (Rs. 69,215 / mo)
100 Lenders	Rs. 1,999 / mo	Rs. 1,99,900 / mo	Rs. 1,200 / mo	99.4% (Rs. 1,98,700 / mo)

6. Sales Pitch & Objection Handling Playbook

- The 'One Default' ROI Closer: 'Sir, if even a single Rs. 15,000 borrower defaults or misses 3 months of interest because you forgot to track their due date, you have lost more money than this software costs for an entire year. InterestAccurate pays for itself in week one.'
- Overcoming 'I already use paper notebooks': 'Paper diaries can be lost, damaged, or manipulated by staff. With this system, every payment produces a clean printed or WhatsApp receipt instantly, and your exact interest accrued is updated automatically every single day.'
- The 14-Day Risk-Free Trial Close: 'You don't need to pay today. Let me set up your firm name and 5 sample borrowers right now. Use it for 14 days for free. If it doesn't save you at least 1 hour every day, you don't pay a single rupee.'
